TWO RIVERS SETS SIGHTS ON VALLEY COUNTY BUSINESSES

Glasgow, MT December 15, 2017 – The Valley County Business Incentive Committee seeks to identify and create valuable incentives for potential, new and expanding businesses in Valley County.

Two Rivers Economic Growth's Valley County Business Incentive Committee is focused on recruiting new business into the area as well as supporting existing business with ongoing needs. Whether it is start-up money, training opportunities, signage, building location, etc., we understand there may be barriers to success for business owners/operators and budding entrepreneurs. We have currently developed resource folders with information on various issues that have been identified so far and we encourage anyone interested to pick up a packet at the Two Rivers/Chamber located in Glasgow at 313 Klein Ave.

We are also seeking public feedback via a short online survey so that we can better serve existing needs and address barriers towards success. Once we can identify where the greatest needs are, we will be better positioned for projects, education opportunities and outreach efforts throughout Valley County, creating a lasting economic impact that results in a strengthened business sector and vibrant communities. Hard copies of the survey are available at the Chamber/Two Rivers Office for those unable to participate online.

We encourage members and non-members alike to respond to this survey, so we can continue to fulfill our mission of making Valley County the best place to live, work and play! A link to the survey can be found online at www.GrowValleyCounty.com and the new Glasgow, MT Facebook page, www.facebook.com/glasgowMT59230.

Please contact the Two Rivers office by calling 406-263-GROW (4769) or email trg2@nemont.net with any questions or concerns.
